Chuck controller required additionally

[Features]

- A special construction to cool the electromagnetic coils directly.
- A unique construction; accuracy change is very small and temperature rise is minimized by using both cooling water flowing inside the chuck and grinding fluid sprayed over the top surface. This design minimizes thermal expansion of the chuck due to temperature rise.
- Cooling water flows inside the chuck, but KANETEC's original design protects the internal coils from damage.
- Most suitable for dry grinding operations as heat of workpieces is also removed.
- A resin-bonded structural face plate having little environmental burden is employed.

KCT-5050F	500(19.6) × 500(19.6)				500(19.6)		451(17.7)							0.93A	167kg/368 lb			
KCT-5060F	500(19.6) × 600(23.6)				600(23.6)		529(20.8)							1.06A	204kg/449 lb			

*If the magnetic force needs not be adjusted, use ES-M. *A cooler unit is required additionally.

*The chuck controller and clamp parts are not included. The KANETEC chucks work best when a KANETEC chuck controller is used. *Only the side stopper is included. (The back stopper is not included.)

Model KCT-U

WATER-COOLED TILT TYPE ELECTROMAGNETIC CHUCK

[Application]

Suitable for high precision angle grinding.

[Features]

- Cooling water flows inside the chuck, but KANETEC's original design protects the internal coils from damage.
- Since the cooling hose is connected to the shaft, a desired tilting range can be set.
- The hose does not become an obstacle regardless of tilting angles of the work face. Grinding at a tilted angle can be carried out without paying attention to the hose location.
- The tilting angle can be set as desired in a range of 90° forward and 90° backward.
- Cooling water is let flow inside the chuck to cool the coils directly and grinding fluid cools the top surface to provide a high cooling effect to minimize temperature rise. This design thus minimizes accuracy change of the chuck.
- A resin-bonded structural face plate having little environmental burden is employed.
